

us: Statistician [PhD or equivalent in stat; sampling, multivariate/comp stat, bootstrapping, smoothing, Bayesian methods] / Statistical Consulting Section at Savannah River National Laboratory / US Citizenship required

Math-jobs.com - better people, better jobs, better companies

Savannah River National Laboratory

The Statistical Consulting Section of the Savannah River National Laboratory (SRNL) is seeking a statistician with a PhD or equivalent in statistics.

The position requires the individual to be adept at working independently, as well as contributing as a member of a team of engineers and scientists. Skills are needed in the formulation, development, and communication of creative solutions to complex problems in project areas of homeland security, radioactive waste vitrification, nuclear nonproliferation, and environmental waste remediation. Desired background includes sampling and multivariate and computational statistics: bootstrapping, smoothing, and Bayesian methods.

Equal Opportunity Employer M/F/D/V.

US Citizenship required.

If interested, please contact Bernice Miller (bernice.miller@srs.gov) with CV and cover letter.
