Dear students,

welcome to study in subject *Transport Vehiles and Handling Machinery* (KKS/ZDMT) in the Erasmus programme.

My name is Ladislav Nemec, nemecl@kks.zcu.cz,

I'm a teacher at fakulty of Mechanical Egineering, Department of Machine Design, room UK114 (ground floor in the building of Faculty of Mech. Eng.), phone +420 377 368 258 (or shortly 8258 in the university phone net)

The base information on internet to this subject ZDMT is on the address portal.zcu.cz

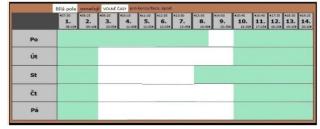

You must log in with your orion nick. Then switch to English in the upper right corner. Then click on "Study" and "Courseware". Then "Courses by Faculties". Then find "Department/Unit = KKS", "Course = ZDMT". On the first sheet there is a link to "ERASMUS - TRANSPORT VEHICLES & HANDLING MACHINERY". There you can find materials to lectures / to tutorials / to an exam

Official meetings and consultations

The schedule of my free time for personal meetings and consultations is shown in the table on my website (see link meecl@kks.zcu.cz). Suitable time intervals for this contact are shown in the white zones. Suggest a consultation time to these white zones by e-mail and then we will specify the proposed time.

FOR EXAMPLE!

Lectures

On web (see link above) there is a set of texts to the lectures. Because the texts of lectures are relatively simple, the lectures will have a form not of regular lecturing, but a form of "seminar" - you will study this materials in private and if you have some incomprehensions or questions, come please for consultation or write me the e-mail with these problems . We also will have several control meetins during the sem.

Tutorials

You will have to make several tasks, to obtain the credit (continuous assessment) needed for comming to the exam. All materials necessary to make these tasks you will find on the link above, so if you will explore them along with the lectures, you will be able to handle tasks without problems.

Exam

Before the exam, each student must obtain the credit (continuous assissment). The exam will be formed by a written test of knowledge about the lectures (see powerpoint presentations to each lecture) and then a short discussion on it,

Best regards

Ladislav NEMEC
