Subject matter

The IP course familiarizes students with the complex issue of the biomass utilization for power and heat production in low-power systems (co-combustion of biomass in small power boilers, environmental aspects and economical influences on local energy and heat production market).

6.7. and 17.7. – arrival day and departure day

– (or in morning on 7.7. and in evening on 16.7.)

7.-16.7. – 10 working days: lectures of the teachers and experts, excursions (boiler producers, biomass farming, biomass co-combustion)

The participants of the IP course are MA or BA students. The course is also open to PhD students.

Completion of the IP course will be confirmed by the written certificate with 4 ECTS credits.

Additional information

Organizers cover costs of travel, maintenance and accommodation. Accommodation is in hostel TRIM <http://www.hosteltrim.cz/>
